<p>Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).</p>			
<p>NOTICE OF APPEAL</p> <p>2. <input type="checkbox"/> The Notice of Appeal was filed on _____. A brief in compliance with 37 CFR 41.37 must be filed within two months of the date of filing the Notice of Appeal (37 CFR 41.37(a)), or any extension thereof (37 CFR 41.37(e)), to avoid dismissal of the appeal. Since a Notice of Appeal has been filed, any reply must be filed within the time period set forth in 37 CFR 41.37(a).</p>

 F. Daniel Lopez Primary Examiner Art Unit: 3745			

Continuation of 11. does NOT place the application in condition for allowance because: Applicant's arguments concern the ride improvement system remaining operable while the loader arm is raised or lowered. This is understood to be supported by the declaration and exhibits. It is further understood that remaining operable means that the first and second valves are activated as soon as the lever is released from the lowering position.

The question is what positions do the first and second valves take, when the ride improvement system is operable and the lever is in the lowering position. Exhibit B indicates that the SRS system is deactivated (sixth paragraph), and indicates that deactivating the SRS system means both valves are de-energized (fourth paragraph, emphasis added). The statement on page 3 paragraph 10 of the declaration only states that the ride improvement system remains operable when lowering, but does not say what positions the valves are in.

It is understood that at some point, applicant realized that only one of the valves needed to be closed (as shown by applicant citing the specification and claims), but these exhibits and declaration do not provide any indication as to when this occurred. .
